

Yuliia Chebotar

FRONTEND DEVELOPER

chebotar609@gmail.com |

[LinkedIn](#)

Frontend engineer with expertise in various technologies and over 2 years of industry experience. I specialize in creating beautiful and functional UI using a variety of web technologies, including:

- JavaScript / TypeScript
- React / Next.js
- React native (basic knowledge)
- Express.js / NestJS
- HTML5
- CSS3 / SCSS
- MongoDB / PostgreSQL
- Git / GitHub
- Chakra UI / MUI
- Headless CMS Prismic / Payload, Webflow
- Figma / Photoshop
- Asana / Slack / Mattermost

Soft skills:

- Active participation in all project communications within the team (PMs, BAs, developers, testers);
- Achievement orientation;
- Adaptability (teamwork, loyalty, creativity);
- Critical and strategic thinking;
- Detail-Oriented;
- Proven experience in collaborating within multinational teams, using English as the primary communication language for seamless interaction.

Experience

Front-end Engineer - ElifTech. Ukraine.

Aug 2022 - Mar 2024(1 year 6 months).

Main responsibilities:

- Maintained regular communication with the customer's team, providing project quality reports and conducting demo sessions, ensuring alignment with customer expectations and fostering a collaborative working relationship;
- Design, development, and debugging of consumer-based products;
- Taking part in onboarding engineers.

Art Gallery Entertainment portal. [Link to prod.](#)

Planned and built the front-end part completely from scratch. Implemented smooth transitions and animation of components. Maintained admin panel in Payload CMS.

Key Technologies Stack: React, Next, GraphQL, Headless CMS Payload, Google Map API, Spotify API, Figma.

Paragliding Enthusiast Social Network

A social network designed to facilitate the search for relevant Paragliding jumping spots by providing you with all needed information (including directions, on-spot events, user reviews, and even real-time weather). It also allows you to share your successes in your profile and stay updated with the latest community events.

Created and built interfaces for the major part of pages and screens. Add a lot of features, including the “User Profile”, “User Reviews” and “Complaints and Suggestions”.

Key Technologies Stack: React.js, XState, TypeScript, NestJS, Sequelize, NX, MapLibreGL, jQuery, and Socket.io.

HoneyM Fintech Application

Our team contributed significantly to developing the HoneyM fintech application designed to empower users to achieve their financial goals and dreams.

I implemented a “Wishlist” feature, allowing users to plan and organize their wishes and budgets within the application. Achieved a sleek and minimalist design, ensuring an intuitive user experience.

Key Technologies Stack: React, Material UI, Redux Toolkit, Redux-persist, Axios, Google Analytics, Express, MongoDB + Mongoose, Swagger, Socket.io, Winston

Front-end Engineer - Custom4Web. Ukraine.

Feb 2019 - Aug 2019 (6 months)

E-commerce projects on the US market.

Main responsibilities:

- Create maintainable, cross browsers webpages using HTML5/CSS3/JS;
- Customer support (questions, issues, bugs).

Key Technologies Stack: JavaScript, Vue js, HTML 5, CSS 3 / SCSS, Bootstrap 3/4, jQuery, WordPress, Photoshop.

Front-end Engineer - Triplefork IT. Ukraine.

Apr 2018 - Feb 2019 (11 months).

E-commerce projects for large Ukrainian market leaders in the field of medicine, spare parts for machines, and perfume distributors.

Main responsibilities:

- Create maintainable, cross browsers and reusing webpages using HTML5/CSS3/JS;
- Page loading optimization through code refactoring and asset compression;
- Implementation of SEO amendments;

Key Technologies Stack: JavaScript, HTML 5, CSS 3 / SCSS, Bootstrap 3/4, jQuery, WordPress, Photoshop.
