

Yuliia Chebotar

FULLSTACK ENGINEER — REACT / NEXT.JS / NODE

chebotar609@gmail.com · [LinkedIn](#) · [GitHub \(Work\)](#) · [GitHub \(Personal\)](#) · [Portfolio](#)

Fullstack engineer with **5+ years** shipping production interfaces and **CMS-driven** content platforms, spanning contractor and full-time roles across Icelandic and Ukrainian teams. Builds motion-rich, design-accurate front ends in React/Next.js and pairs them with Node (Express/NestJS) APIs - comfortable owning a feature from Figma handoff to deployed code. Works daily in **English** across distributed, multinational teams.

CORE SKILLS

Frontend

React Next.js TypeScript React Native (basic) SCSS Storybook

Backend

Express.js NestJS GraphQL REST MongoDB Sequelize Zod

General

Vercel Git Claude Code Cludo AI Asana Slack Jest (basic) English C1

CMS & Design

Payload CMS Prismic Figma Photoshop

EXPERIENCE

Fullstack Engineer — Hugsmiðjan (Iceland), Contractor June 2024 - Present

- Own **front-end architecture** in Next.js/TypeScript, establishing shared component and animation patterns reused across 3-6 page templates.
- Built and maintain the Payload CMS admin panel, giving the content team self-serve control over 3-6 content types without engineering involvement.
- Design and implement transition/animation systems that raise UI polish on key user flows.
- Runs **code reviews** for the team and uses **Claude Code** as an AI-assisted development tool to speed up performance tuning and edge-case coverage - a complement to, never a substitute for, hands-on engineering judgment.

Art Gallery Entertainment Portal [Link to prod →](#)

Built the entire front end from scratch (React/Next.js/GraphQL), integrating and maintaining connections to Google Maps and Spotify APIs — handling data mapping and edge cases end-to-end. Designed the component animation system in Figma before implementation, then maintained the Payload CMS backend for ongoing content updates.

Stack: React, Next.js, GraphQL, Payload CMS, Google Maps API, Spotify API, Figma

Fullstack Engineer — ElifTech (Ukraine), Full-time Aug 2022 – Mar 2024

- Acted as primary technical point of contact for the client - ran **demo sessions** and quality reports that kept delivery aligned with expectations.
- **Onboarded** 2 new engineers, cutting ramp-up time via structured knowledge-transfer sessions. Designed, built, and debugged consumer-facing features across two production applications.

Paragliding Enthusiast Social Network

Built User Profile, Reviews, and Complaints & Suggestions modules end-to-end — React/TypeScript front end backed by NestJS APIs, including Sequelize schema design and migrations for those modules. Integrated MapLibreGL for real-time jump-spot discovery with weather and directions, plus Socket.io for live updates.

Stack: React, XState, TypeScript, NestJS, Sequelize, NX, MapLibreGL, Socket.io

HoneyM Fintech Application

Shipped the Wishlist budgeting/goal-planning feature end-to-end, designing the MongoDB schema and Express API alongside the React UI, with Swagger docs and Winston logging.

Stack: React, Material UI, Redux Toolkit, Express, MongoDB, Swagger, Socket.io, Winston

Front-end Engineer — Custom4Web (Ukraine), Full-time Feb 2019 – Dec 2019

- Built and maintained cross-browser e-commerce pages (HTML5/CSS3/JS/Vue) for US-market clients on WordPress.
- Handled direct customer support for bug and issue triage.

Front-end Engineer — Triplefork IT (Ukraine), Full-time Apr 2018 – Feb 2019

- Built e-commerce pages for Ukrainian market-leading clients in medicine, auto parts, and perfume distribution.
- Reduced page load times through code refactoring and asset compression; implemented SEO improvements.

EDUCATION

M.A., Entrepreneurship & Business — Simon Kuznets Kharkiv National University of Economics, Ukraine | B.A., Accounting & Audit — same institution
